Kubota KX080-4 Super Series 2 Power Utility Excavator: **Clean Performance To A Wide Range of Jobs**

Powerful and easy to operate, the KX080-4S2 is also environmentally friendly, making it the number one choice for all your power utility excavation jobs.

The KX080-4S2's performance is powerful and clean. It starts with brute strength in the rugged and reliable direct-injection Kubota engine and an optimal-combustion CRS, and a DPF muffler. With an improved regeneration system, the regeneration interval is now approximately 1.5 times as long** as the previous model.

**With an improved
regeneration system, the
regeneration interval is now
approximately 1.5 times as
long as the previous model.**

A new, 2-pump, load-sensing system allows you to effortlessly perform simultaneous operations when using the front attachments. Coupled with a 7' 2.6" machine width, tight tail swing, a bucket force of 14,660 lbs. and a smooth auto-shift system, the KX080-4S2 is now more efficient and 5% more stable. Thumb-operated auxiliary circuits and a maximum, oil-flow setting—adjustable on the digital panel—along with a Hydraulic Angle Blade (with float position) option now make ground finishing

work fast and easy. A maximum digging depth of 15' 1.1" also means there are few places the KX080-4S2 won't go. The auto-idling system automatically idles engine RPM, reducing noise and exhaust emissions as well as fuel and overall operating costs. Move any control lever and the engine RPM immediately returns.

The KX080-4S2's wide and roomy cab offers a new level of comfort and control on the job. Kubota's new Intelligent Control System LCD digital panel displays easy-to-read machine status and helps reduce downtime and costly repair by keeping you informed of your current working conditions. A deluxe suspension seat, movable console, easy-open front window and Two-Pattern Selection System (TPSS) also put the operator firmly in the driver's seat in terms of comfort and machine control.

A myriad of safety and maintenance features from OSHA-certified ROPS/OPG; rugged, 18- or 24-inch steel crawlers; all three of the excavator's access panels opening at once ... to a two-piece hose design, which reduces hose replacement time by nearly 60%, mean the KX080-4S2 is built for safe operation and long-lasting dependability.

Contact your Columbus Equipment Company representative today for a demo of the 18,596 to 19,566 lb. Kubota KX080-4 Super Series 2 Power Utility Excavator. It'll likely be the solution to your next jobsite excavation challenge.

*For complete warranty, safety and product information, consult Columbus Equipment Company and the product operator's manual. Power (HP/KW) and other specifications are based on various standards or recommended practices.
**Based on Kubota test. Actual interval depends on each job site and working condition.

Takeuchi TB370 Compact Hydraulic Excavator: Next-Gen Excavator Adds Muscle to Takeuchi Line-up

An innovative global leader in compact equipment, Takeuchi-US has just launched the first machine in the company's 300 Series line of compact hydraulic excavators—the TB370. This latest edition is in the 6-7 ton class and is an exceptional option for a wide range of contractors including general contractors, landscapers, utility contractors, as well as the rental industry.

The TB370 is in the 6-7 ton class and is an exceptional option for a wide range of contractors.

“Takeuchi is extremely excited to advance the next generation of excavators,” says Keith Kramlich, National Product and Training Manager at Takeuchi. “By adding the TB370 to our excavator line-up, Takeuchi continues its long-standing tradition of innovation and technology that improves efficiency and performance.”

The TB370 features an operating weight of 14,793 lbs., a dig depth of 13' 4.8", maximum reach of 21' 11.3", and a bucket breakout force of 14,613 lb. A Kubota turbocharged, EPA Final Tier 4 emission-compliant diesel engine delivers 56.8 hp and 157 ft-lb of torque. The TB370 also features a load-sensing hydraulic system that provides 31 gpm of auxiliary hydraulic flow making it

an extremely versatile, powerful, and efficient machine.

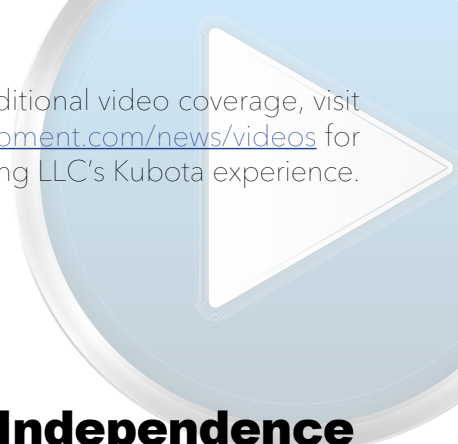

The TB370 also boasts a wide range of state-of-the-art features that include an 8" touch screen, multi-function color monitor with integrated air conditioner and radio functions. The automotive-styled interior is spacious and has been completely redesigned, promoting operator comfort throughout the day. An intuitive jog dial and switch panel gives the operator complete control of machine functions and features.

For greater versatility, the TB370 will include first, second, and third auxiliary circuits that will allow the operator to run a wide range of attachments. The additional third circuit gives the operator the option of adding a hydraulic, pin-grabber coupler to simplify and improve attachment interchangeability.

Contact your local Columbus Equipment Company compact equipment representative for a demo of Takeuchi's impressive TB370 today!

Team Stanley Excavating LLC: Aspiring Brothers Realize Long-Earned Independence

For years, brothers Gordon Stanley and Shane Stanley talked about starting their own contracting business to build on their combined 50-plus years of construction experience. They finally made their move in the summer of 2017. Shane quit his job and convinced Gordon to do likewise.

That July, they formed Team Stanley Excavating LLC, and they've been busy with projects around Columbus since then. They perform a wide range of work, including:

- Installing/repairing water, storm and sanitary lines.
- Roof drains.
- Cutting in and grading driveways.
- Digging ponds.
- Clearing land.

One thing they were sure of from the start was that they would use Columbus Equipment Company as their equipment supplier. Gordon Stanley was familiar with Columbus Equipment Company because his former employers, including Savko & Sons and Trucco, also used the dealership.

"I was very familiar with Columbus Equipment Company," Gordon Stanley said. "I was familiar with the service and I knew what I was getting with them. We like to buy local and stay local."

Since the start, Team Stanley has worked with Cory VanHouten, compact sales rep in the Columbus Branch. "He's been fantastic," Stanley said. "Whether

I'm renting, buying, or looking, I can call him, and he takes care of it for me. He does all the legwork."

At first, Team Stanley rented all its equipment, which gave the brothers time to check out various brands. When they decided to buy some pieces, the choice was clear. "We liked Kubota. We couldn't beat the price or the dependability," he said.

**"We liked Kubota.
We couldn't beat the price
or the dependability."**

Gordon Stanley; President, Team Stanley Excavating LLC

They first purchased a Kubota KX057 conventional tail-swing excavator. A few months later, they added a Kubota SVL75 track loader.

"Those two pieces are the bedrock of our company," Stanley noted. "We work them pretty hard. We use them every single day." The excavator is the right mix of size and power for digging driveways, water service, and storm sewers. The track loader is an excellent choice for carrying gravel or pipe and for backfilling, he explained.

“For the work we do, they are perfect for us. If we need something bigger, I call Cory and rent something bigger for a day or two.” Columbus Equipment Company has been a one-stop-shop for Team Stanley, which has also purchased attachments and additional compact excavating equipment from the Columbus branch.

“The Kubota machines have been extremely dependable with no service issues,” he added. “We haven’t had any issues in the time we’ve owned them. Columbus Equipment Company does the service on them, and we haven’t had to sink any money into them aside from PM. The service department is great whenever we call them.”

“The Kubota machines have been extremely dependable with no service issues.”

Gordon Stanley; President, Team Stanley Excavating LLC

Gordon and Shane got into construction by following in their father’s footsteps. Gordon began as a laborer at Savko & Sons, then became a pipelayer and a foreman. Shane started as a laborer, then became an operator. “We’ve got the bases covered between the two of us,” Gordon Stanley noted.

They each worked at Savko for about 20 years, and today the majority of Team Stanley’s work is as a subcontractor for Savko. “Marty Savko took us under his wing. He gives us any jobs that are too small for him to put a crew on. It’s a win-win for both of us,” Stanley said. “It’s almost been like a family company. I don’t know if we’d be where we are now without those guys.”

Team Stanley also works for small customers,

including homeowners in the Columbus area. The company’s goal is “to provide the same quality workmanship, learned through years of working at large companies, to the small business and individual.”

The company has been able to find enough work to keep busy in Columbus without having to travel far from their Ashley, Ohio, base.

Operator Chad Seely moves storm pipe with the company’s Kubota SVL75-2 CTL on a commercial site development project in New Albany, OH.

The company is truly a family operation, with the wives of the two co-owners taking care of the behind-the-scenes paperwork. The brothers are the only full-time employees, and they have a nephew and a few long-time acquaintances available as subs on larger projects.

After years of thinking about going into business for themselves, the brothers are happy with how things have turned out. “We’re happy with the size we are. We fill a good niche in the area, and we’re content to stay there,” Stanley said.

It takes some companies years to find the right niche, but Team Stanley seems to have landed on theirs quickly, thanks to experience, industry knowledge, and dependable Kubota equipment.
